Lighthouse (UK) Ltd

CPM-100
Multi-Colour Desktop Sign & Label System

save time • save money • improve processes

Sourcing appropriate labels and signs can often be time consuming and costly, especially where only small quantities, specifically worded, or exact sized outputs are required. This is where the CPM-100 solves problems, by allowing you to produce exactly what you want, when you want it... 24 hours a day!

Why purchase a CPM-100?

There are endless applications for the unique capabilities of the CPM-100, within industrial, commercial, education, governmental, health, sport and manufacturing sectors. These include:

- Health & Safety Signs
- Engineering Labelling
- Continuous Improvement Applications
- 5S Labelling
- Kanban Labels
- Electrical marking
- Plant ID
- Asset Labelling
- Pipe Marking
- Facilities Management Signage
- Nameplates
- Visual Management Labelling
- Chemical Labels
- Laboratory Requirements
- Logistics Labels
- Directional Signage
- Vehicle Labels

How does the CPM-100 work?

The CPM-100 combines thermal print and vinyl-cutting technology, together with our tried and tested software, to produce multiple spot-colour outputs. So for example, you can design and print a multi-coloured label that can then be contour-cut to the size required.

With a print length of up to 1.5 metres, large labels and signs can be created, as well as multiple custom-cut labels. For instance, if printing a run of typical asset labels, 25mm x 50mm, the CPM-100 could produce over 100 in one go.

Included Software

Our innovative Microsoft Certified software enables you to incorporate sequential numbering, information from databases and even barcodes. With a comprehensive clip art gallery containing more than 3,800 symbols, all health and safety needs are taken care of. As well as the built-in symbols, you can easily introduce your own logos, diagrams and schematics.

You can cut hundreds of different shapes using the symbols in the gallery, or you can import any shape you require using wmf (Windows Metafile).

Consumables

Our consumables have recyclable cardboard cores and ribbons are placed in refillable cartridges, making them both environmentally friendly and cost effective. We have a large range available from stock, and can also produce specialist made-to-order materials.

Create your own signs & labels wherever & whenever you need them

How can we help you to get the most out of your CPM-100?

- We offer on-site training and support
- Support and advice by phone, fax & email
- Updates, technical data, instructional videos, new clipart and the latest drivers, can all be downloaded from our website

How much does it cost?

The complete CPM-100 system, including dedicated Microsoft certified software, USB cable, weeding tool and squeegee is only:

Branded safety label:
100mm x 236mm. Cost: £1.64

Destructible asset label:
50mm x 20mm. Cost: £0.14

Safety label: 80mm x 80mm
Cost: £0.37

Bespoke cut TPM label:
75mm x 100mm. Cost: £0.60

Racking label: 490mm x 45mm
Cost: £1.41

CLP / GHS pipemarker:
525mm x 95mm. Cost: £3.64

Why choose a CPM-100?

- ✔ On-demand custom labels
- ✔ Multi-colour printing
- ✔ Cut labels to any shape
- ✔ Print barcodes & variable data
- ✔ Microsoft Certified software
- ✔ Extensive consumables range

Lighthouse
(UK) Ltd

a part of
MAX

Here at Lighthouse (UK) Ltd, we manufacture to the highest quality and ethical standards. Having achieved and maintained both ISO 9001 & ISO 14001 certification, we pay particular attention to the impact of our production processes and products on the environment.

All our consumable products utilise cores and packaging which are both recycled and recyclable. Uniquely in our market, our printing cartridges are refillable, thus reducing waste, disposal issues and cost.

Above is our Max Co Tamamura plant in Japan, where CPM hardware is manufactured.

Lighthouse products are RoHS, WEEE and REACH compliant and all systems are CE Certified.
